

GUARDIAN

PREVENT. PROTECT.

REAL-TIME DRIVER FATIGUE AND DISTRACTION ACCIDENT PREVENTION TECHNOLOGY

- Scientifically proven to reduce driver fatigue related events by upwards of 90%
- Real-time in-cab intervention
- Managers are notified of risk within minutes
- Provides managers with intelligent data to improve driver behaviour
- Respects driver privacy

Guardian by Seeing Machines uses sophisticated eye and face tracking algorithms to detect driver fatigue and distraction, providing immediate intervention when a driver is at risk.

“
No Qube truck fitted with Guardian has had a fatigue or distraction rollover incident.

”
MIKE MULLIGAN, NATIONAL HSE MANAGER,
QUBE AUSTRALIA
